

## ACCOYA

Delta began working with Accoya in 2014 and was the first company in the U.S. to offer both shou-sugi-ban (charred) and factory-finished stained Accoya siding and decking products. When domestic softwoods were not living up to our standards, we sought after the best alternative in both performance and sustainability. We discovered Accoya and have made it a focus of ours ever since. Its quality aligns with the approach Delta takes to our products. We have a close working relationship with the Accoya team and work hand-in-hand on product development, large projects and in technical consulting. We continue to develop siding and decking products within our Accoya line, focusing on custom textures, charring methods, and factory-finished stained options. We believe these products are the best-in-class in both structural performance and quality of the finishes applied. Delta is the foremost supplier of Accoya products in North America.

**SUSTAINABILITY** - Accoya's Radiata Pine is grown on sustainable tree farms and ready to harvest in 28 years on average, all the while sequestering carbon. Accoya is a carbon-negative product due to its harvesting methods, clean treatment and overall longevity. Accoya is vastly more sustainable than Ipe and other tropical hardwoods, as well as synthetic siding and decking alternatives.

UNFINISHED → NATURALLY WEATHERED

**STRUCTURAL WARRANTY** - 50 years above ground, 25 years below ground or in contact with freshwater with a useful life expectancy of 70 years.

**ENVIRONMENTALLY FRIENDLY TREATMENT PROCESS** - Although Accoya is a chemically-modified product, the only byproduct of the acetylation process is food-grade vinegar. When Acetyl alcohol comes into contact with water it becomes vinegar, which is repurposed for the food industry. Accoya is totally non-toxic to humans, plants & animals, and is actually 'food-grade' rated.

**NATURALLY INSECT RESISTANT DUE TO ACETYLATION PROCESS**

**STAINLESS STEEL FASTENERS REQUIRED - RING SHANKED SIDING NAILS OR SCREWS**

**CUT ENDS NEED TO BE SEALED ON-SITE**

## PRODUCT SPECIFICATIONS

STANDARD SIZES STANDARD PROFILES	1x4, 1x6, 1x8, 2x4, 2x6, 2x8	APPLICATIONS / USES	Interior & Exterior: Siding, interior paneling, decking, fencing, exterior roofing
	Tongue & Groove, Shiplap, S4S	LENGTHS
