

Delta Millworks is excited to offer online AIA CEU courses on Acetylated Wood and Shou Sugi Ban 101. If you are interested in scheduling a virtual CEU presentation for your firm, please contact your sales representative for more information.

ACETYLATED WOOD: DURABLE, STABLE, SUSTAINABLE

Course Description

This course discusses the the process of wood acetylation, the resulting changes to the wood, applications for acetylated wood, its green credentials, and a number of case studies involving acetylated wood.

Learning Objectives

- Define the term “Acetylated Wood”, and gain a basic understanding of its history.
- Learn the benefits of the acetylation process, and why it is a safe, nontoxic alternative to other materials.
- Describe how the wood used in the acetylation process is a natural, renewable resource that qualifies for LEED points.
- Review global projects and learn why acetylated wood is used.

Credits earned on completion of this course will be reported to AIA CES for AIA members. Certificates of Completion for both AIA members and non-AIA members are available upon request.
